mprehensive Patient Monitoring System 02-25

Comprehensive NICU Solution 26-39

Comprehensive OR Solution 40-63

Comprehensive ICU Solution 64-83

Comprehensive Patient Monitoring System

K1

Specialized Transport Patient Monitor

Concise, Intuitive, Powerful

- Compact size 148.4×79.2×96.5mm, Light weight 2.5kg
- Fixed handle and modular rack, carry with ease
- 5.5-inch capacitive touchscreen 1280×720 high resolution
- Supports multi-touch operation, easy to learn and operate
- IP44 Ingress Protection, 1.2m Drop Endurance and 10-hour Battery Life

Seamless Integration, Just Dock It.

- With the certification of EN1789, the K1 can be used as a specialized ambulance transport patient monitor.
- Couples as plug-and-play multi-parameter module for the K Pro series patient monitors to achieve seamless transmission of patient data from transport straight to the ICU.
- Compact and flexible, the K1 also functions perfectly as a bedside patient monitor when equipped with a module rack and docking station that enables connection to an external display.

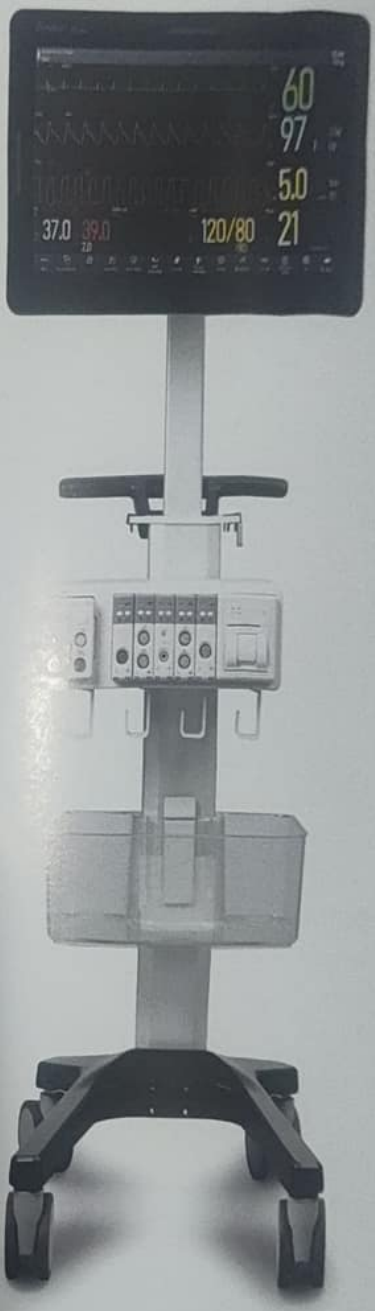

Diagnostic Excellence through Reliability and Versatility

- K1 delivers basis measurements including 3/5/6/12-lead ECG with ST and QT analysis, respiration, NIBP, SpO2, temperature, built-in sidestream EtCO2 and dual IBP.
- With modular rack, K1 supports one extended module and provides advanced measurements including mainstream or sidestream EtCO2, dual IBP, invasive cardiac output(C.O.), BIS, AG, NMT, RM, Rainbow Set and apnea wake-up function for infants.
- Alarm Event 2000 groups, NIBP 2000 groups, ARR Event 48 hours, Full Disclosure 48 hours, Trend Graph and Table 160 hours.
- Clinical Assistive Application(CAA) including Early Warning Score (EWS), Glasgow Coma Scale (GCS), SpesisGuide and 24 hours ECG summary.
- WIFI and wired connection to central monitoring system on the move or at the bedside. Seamless and offline data transmission to K Pro Series when working as a module.

K22Pro

Patient Monitor

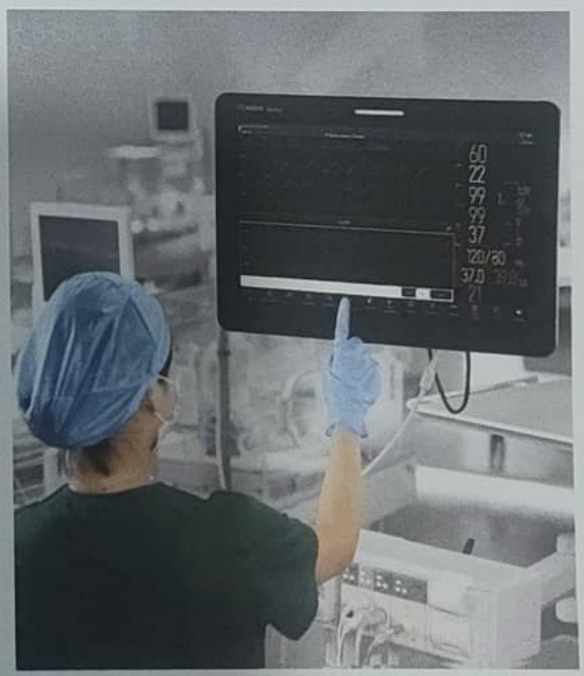

See More, From Another Perspective

For clinicians, viewing more vital signs from the monitor is significant. Especially, when the patient is under severe condition, a great monitor able to provide more insights can help the clinicians to make informed decisions.

Thus, Comen develops K22Pro to fulfil the needs of 'bigger' vision. For its screen size. It provides a 21.5-inch capacitive screen. In the meantime, the monitor can rotate to either landscape or portrait mode.

Regarding the landscape, it enables clinicians to view longer chosen waveform on the monitor and observe their variance in detail. In comparison, portrait mode is aimed to display more waveform channels, under this mode, clinicians can select more vital signs to display on the screen simultaneously. It is suitable for the patient required a comprehensive monitoring.

N Series
Patient Monitor

Clear and Efficient Monitoring

For patient monitoring, It's significant to see measurement results quickly and clearly for caregivers during patient monitoring. With a high-resolution display and a capacitive touch screen, the N series can facilitate clinicians to observe clearly and complete the monitoring settings efficiently.

More Capability in One Monitor

In addition to supporting the monitoring of essential vital signs through pre-configured parameters, it can be easily extended to two advanced parameters simultaneously. This makes Comen NM & NMPro modular patient monitors can better provide advanced monitoring solutions whether you are in the emergency room, ICU, NICU, operation room, etc.

N Series

Patient Monitor

Clear and Efficient Monitoring

For patient monitoring, It's significant to see measurement results quickly and clearly for caregivers during patient monitoring. With a high-resolution display and a capacitive touch screen, the N series can facilitate clinicians to observe clearly and complete the monitoring settings efficiently.

More Capability in One Monitor

In addition to supporting the monitoring of essential vital signs through pre-configured parameters, it can be easily extended to two advanced parameters simultaneously. This makes Comen NM & NMPro modular patient monitors can better provide advanced monitoring solutions whether you are in the emergency room, ICU, NICU, operation room, etc.

flexibility and Adaptability for Emergency Room

Comen N series provides a unique DC power connector for the N10, to support the long-term monitoring in pre-hospital transportation. In addition, the semi-modular design of N10M/N10Pro ensures flexibility for acute care.

Comprehensive monitoring in the ICU department

Comen N series can provide you with a comprehensive view of the patient's status including continuous cardiac output, Masimo Rainbow Set, IBP, Qt and Qtc analysis, ST monitoring, etc. Which can provide the clinicians with a comprehensive view of the patient's state.

Unique functions designed for NICU

It can not only provide basic parameters to monitor the physical condition of prenatal mothers but also provide unique parameters for use in NICU.

Apnea wake-up and oxygen concentration monitoring functions are specially designed for neonates. In addition to supporting the monitoring of the oxygen concentration in the incubator, it can effectively monitor the respiratory rate in real-time and provide appropriate shaking for newborns to wake them up during apnea.

Intuitive SpO2 interface to help assess neonatal health and reduce the risk of oxygenation intuitively.

OxyCRG interface provides an indicator of breathing efficiency and brain maturity. It combines the compressed trends of a neonate's beat-to-beat heart rate, respiration, and oxygenation levels and presents them in a straightforward display on Comen patient monitors.

ND Series

Patient Monitor

As Friendly as you are.

Simple and intuitive user interfaces reduce the learning curve for healthcare professionals and patients, ensuring that the technology is accessible to a wider audience.

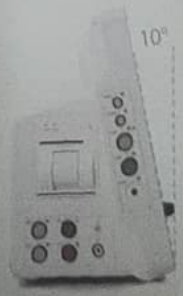

ND series launches three dimensions including 10, 12 and 15 inches.

Accessory storage is common requirements from caregivers. ND series develops practical cabinet for storing idle accessories and provide on time support in need.

In considering the comfort of caregiver while viewing the monitor, ND series implement the design of tilting screen with 10 degrees.

For cleaning and disinfection, the board of accessories cabinet is flexible and rotatable. While pulling it up, the board can be rotated horizontally.

Streamlined functionalities and straightforward operation contribute to faster and more efficient healthcare processes. This is particularly important in critical situations where quick responses are essential.

Reduce Complexity

Minimizing complexity helps in avoiding confusion and errors.

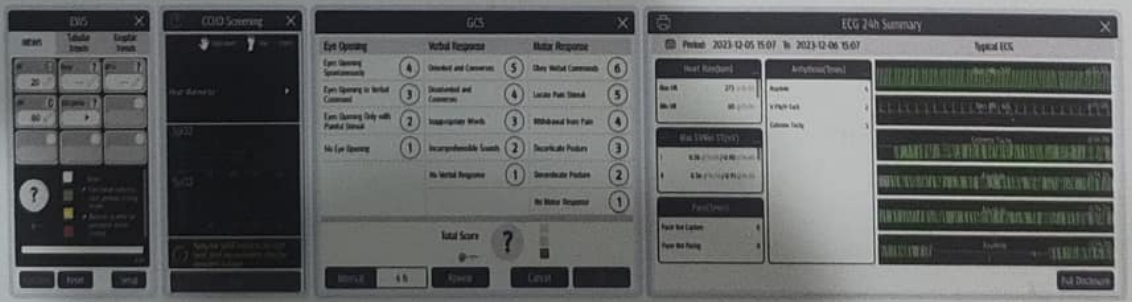

ND series succeeds the user interface design from Comen KPro series and N series. It enables the user to complete all operations in three presses.

Furthermore, caregivers can swipe the screen to view four customized interfaces as required. It effectively minimizes the complexity of patient information and vital signs searching.

For daily monitoring, ND series offer comprehensive Clinical Assistive Applications (CAA) to the caregivers and clinicians. It is incorporated by Early Warning Scores (EWS), Critical congenital heart disease (CCHD), SepsisGuide, Glasgow Coma Scale (GCS), and 24 hours ECG summary.

It allows healthcare providers to focus on essential tasks and data, leading to more accurate diagnostics and better-informed decisions.

S8/S5/S2

Defibrillator Monitor

Advanced BTE Technology

Higher efficiency with Advanced Biphasic Truncated Exponential (BTE) waveform technology and automatic impedance compensation.

Up to 360J energy selection, for patients with high defibrillation thresholds such as myocardial infarction, obesity, high impedance, higher energy selection indicates greater defibrillation success rate.

Comprehensive operation modes

Defibrillation

Manual defibrillation modes include synchronous cardioversion and asynchronous defibrillation.

AED

The model applies patented analysis algorithm and automated analysis as well as convenient setting to guide clinical emergency personnel in providing defibrillation and basic life support.

4 in1

Pacing

Having on-demand pacing and fixed pacing mode, for patients with cardiac arrest and acute severe slow arrhythmia, in vitro non-invasive pacing mode is rapid, easy to master, time-saving and improve recovery success rate.

Monitor

3/5-lead ECG monitoring as standard, optional monitoring functions include SpO2, NIBP, PR and EtCO2 are also available for continuous monitoring of patient vital signs.

Fast Defibrillation

1 knob

Mode can be switched among manual defibrillation, pacing and AED. In manual defibrillation, the user can complete the energy selection within 1 second.

3 seconds

Defibrillator charge to 200J and shock in 3 seconds, rescue time is guaranteed fully.

3 steps

Fulfill defibrillation operation (Energy selection – Charging – Discharging).

NC6 & NC7

Patient Monitor

Excellence in Measurement

In healthcare, every second counts. NC6 & NC7 deliver fast and comprehensive monitor with cutting-edge technology to ensure patients' safety.

• Temperature

Brand Variety and Measurement Sites:

a) Enjoy compatibility with thermometers from various brands, offering flexibility in temperature monitoring.

b) Choose from multiple measurement sites for temperature monitoring, tailoring the approach to individual patient needs.

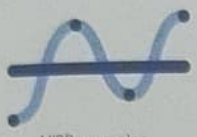

• NIBP

fastBP™ (Inflation Oscillometric Measurement)

Say goodbye to the discomfort and lengthy process of traditional deflation oscillometry. fastBP™ delivers accurate measurements in less than 15 seconds.

NIBP averaging

NIBP Averaging

NIBP Averaging NIBP averaging provides a more accurate picture of patients' condition, enabling earlier detection of hypertension.

Orthostatic Hypotension (OH

Early detection of OH can prevent falls and, as a key indicator of cardiovascular health and autonomic nervous system function, promotes timely medical interventions, significantly improving patient outcomes.

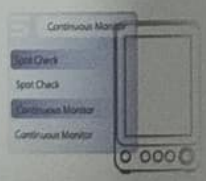

Masimo Sidestream EtCO2 (Only available in NC7)

EtCO2 reflects the partial pressure of carbon dioxide at the end of an exhaled breath, indicating the adequacy of ventilation and overall respiratory function. NC7 provide a holistic view of a patient's respiratory health by offering measurements of both SpO2 and EtCO2, ensuring comprehensive monitoring.

Optimizing Healthcare Workflow

Achieve peak healthcare efficiency with streamlined tasks, tailored workflows, and seamless data connectivity.

Streamlined tasks:

Opt available for Spot Check or Continuous Monitoring-tailored solutions for diverse clinical requirements, ensuring optimal patient care and monitoring efficiency.

Tailored Workflows:

Allowing practitioners to personalize configurations including parameters, layouts, and clinical tools. Tailored to meet specific preferences and needs, promote patient-centered care, maximize workflow efficiency.

Seamless Connectivity:

Easily connect to CMS (Central Monitoring System) or integrate with the hospital information system through HL7, ensuring rapid upload of measurement data.

CF5/CF8

Fetal and Maternal Patient Monitor

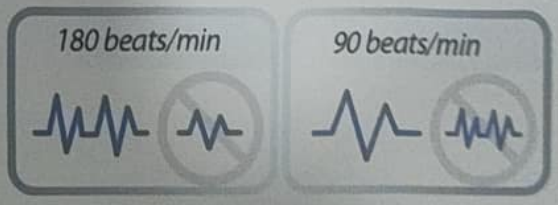

Enhanced Stability:
Advanced Features for Streamlined Monitoring

Fetal Care and Materal Care Monitoring

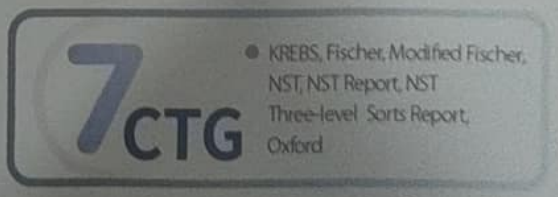

- **Advanced Algorithms**

  Benefit from algorithms that mitigate false alarms caused by fetal movement, ensuring accurate monitoring.

- **CTG Scoring System**

  Choose from seven scoring criteria—KREBS, Fischer, Modified Fischer, NST, NST Report, NST Three-level Sorts Report and Oxford for comprehensive assessment.

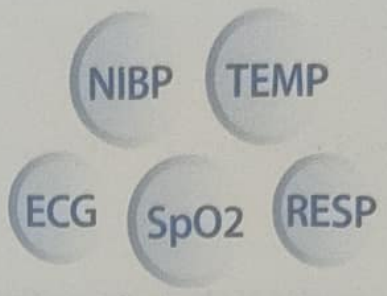

- **Fetal Heart Signal Indicator**

  With three-level signal strength display, quickly locate fetal heart signals and adjust transducer positions for optimal measurement quality.

- Maternal Parameter Measurement

Monitor maternal parameters including ECG, SpO2, NIBP, RESP and TEMP alongside fetal monitoring for comprehensive care.

Seamless Integration

Wireless transducers provide medical staff with a tidy workplace. Also, it can reduce the workload of organizing cables and increase the efficacy of work.

For pregnant, wireless monitoring can improve the comfort and flexibility restricted by cords.

Effortless Transfers

The wireless probe is equipped with a power off storage function of no less than 10 minutes, ensuring the continuity of saving monitoring data. Thus, it enables effortless transfers from the prenatal room to the delivery room without the need to change transducers. When the wireless transducer is taken to the delivery room from prenatal room, the transducer will connect to the new fetal monitor and upload the data to the new machine.

- Wireless Probe

Prenatal Room | Transferring | Labor and Delivery Room

NC3

Vital Signs Monitor

Specially designed for inpatient monitoring and ward rounding, easy and quick to learn basic vital signs; Configured with easy-to-use NIBP, SpO2 functions; Quick ear temperature measurement technique in clinical application: use infrared ear thermometer to learn ear cavity temperature in 1-2s, which is uploaded wirelessly to NC3;

12 hours battery life under standby mode, high resolution display; Simple and elegant, compact and lightweight; Aesthetics, technology, science and wisdom in one.

NC5

Vital Signs Monitor

Ingenious and Minimalistic, Smart and Lightweight

Applied to outpatient, emergency and general wards.

As a spot check monitor and bed side monitor, it integrates NIBP, SpO2, ECG, Ear Temp. It is simple, tasteful, compact and lightweight, a perfect combination of technology and aesthetics.

H12

Electrocardiograph

- 10.4 LCD touch screen
- 12×1, 6×2 format display, vertical screen display
- Support handwriting input
- 10000 patient case storage, support JPG format storage
- FTP / DICOM protocol allow connection with hospital
- HIS, EMR, PACS system without PC workstation

H3

Electrocardiograph

- 6.2" LCD touch screen
- Screen brightness auto- adjustment with ambiant light sensor
- 3×4 and 6×2 display format, 12- lead display simultaneously
- 10000 patient case storage, support JPG format storage
- FTP service allows patient case download in a remote network

CM1200

Electrocardiograph

- 12.1"folding-up touch screen
- Support multi-language, printing preview
- Sleep/wake up mode for saving energy and extending screen life
- Lead status display
- Alphanumeric keyboard, support hand-writing patient information input
- Anti-defibrillation
- 10,000 ECG internal memory
- Last 120 seconds 12-lead waveforms reviewable and recordable
- 216/210mm thermal printer, support rolling paper, and Z-fold paper
- External printer and data transmission support by USB port
- Optional ECG working station

CM1200A

Electrocardiograph

- 8.4 inch LED touch screen
- Alphanumeric keyboard and hidden handle
- Lead status display
- Manual/ Auto/ Rhythm working modes selectable
- Support 4 hours working time
- 300 ECG internal memory
- 210mm, 216mm roll and Z-folded paper for options
- Net-grid on screen for easier observation

CM1200B

Electrocardiograph

- 5.7" Screen
- Lead status display
- Numeric keyboard, backlight design for night use
- 300 ECG internal memory
- 120 seconds 12-lead waveforms reviewable and recordable
- Support 210mm rolling paper, Z- folded paper
- External printer and data transmission support by USB port
- Optional ECG working station
- Basic economic model

C11

Fetal Monitor

- 5.7" screen
- Built-in 112mm thermal printer
- Quick release button for paper replacement
- Built-in Lithium-ion battery , up to 4 hours
- Auto/manual fetal movement marker
- Automatic fetal status scoring system
- FHR signal strength indicator, twins cross channel verification
- Power-off data protection for 300 cases.
- 60 hours real-time waveform replay & storage
- Timing monitoring function to avoid over time monitoring
- Support timing printing
- Compatible with COMEN central monitoring system

C21/C22

Fetal & Maternal Monitor

- 12.1"LCD touch screen
- Screen can be adjusted for multi-angle observation
- Suitable for antepartum and postpartum applications
- Fetal interface, fetal and maternal interface, big font interface
- High sensitive waterproof FHR transducer
- Auto/Manual fetal movement marker
- Built-in 152mm Thermal Printer
- Compatible with COMEN central monitoring system
- Automatic fetal status scoring system: NST, FISCHER, IMPROVED FISCHER, KREBS

C20

Fetal & Maternal Monitor

- 12.1" LCD touch screen
- Full keyboard design makes clinical editing more easily
- Screen can be adjusted for multi-angle observation
- Suitable for antepartum and postpartum applications
- Fetal interface, fetal and maternal interface, big font interface
- High sensitive waterproof FHR transducer
- Auto/Manual fetal movement marker
- Automatic fetal status scoring system
- Built-in 152mm Thermal Printer
- Compatible with COMEN central monitoring system

eCenter-CMS

Central Monitoring System Software

All-in-one Central Monitoring Solution

eCenter-CMS offers unparalleled functionality to healthcare professionals for efficient workflow and centralize monitor, achieving patients information at their fingertips enhancing their responsiveness, while simultaneously ensuring that patients receive timely and appropriate medical attention, significantly improving care outcomes.

Central Station: Tailored for in-depth monitoring in a single department

Empowering you with in-depth monitoring at the departmental level through comprehensive basic operations and diverse interoperability with medical devices, the unique patient grouping feature allows for customized categorization based on clinical focus or attending physician, enhancing data accessibility in an intuitive manner.

Workstation: Achieving patient information flowing across multiple departments

Perfect for facilities with multiple units, the Workstation takes medical devices management and patient management to new heights. With the ability to access and control information from various departments, you benefit from enhanced patient management, multi-bed monitoring, and remote-control functionalities. The system also supports data review and system management, simplifying the process across your entire medical institution.

View Station: Tailored for IT and hospital administrative workers

The View Station offers a uniquely web interface, enabling users to access patient monitoring data from multiple network-connected bedside devices directly from PC in office. It features system maintenance enabling effective management of organizational structures and user roles. The view station provides both multi-bed screen and single patient screen, supporting both real-time and retrospective data access, ensuring all critical information is readily available at a glance for users.

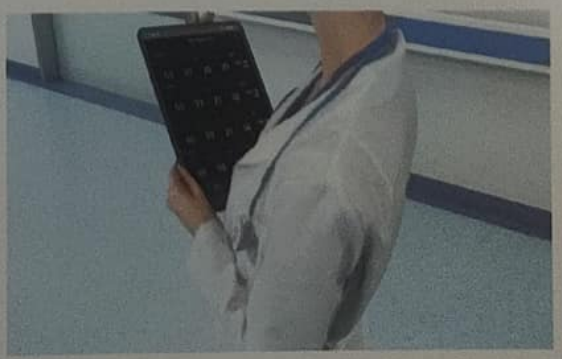

eCenter Viewer: Access to real-time patient information from anywhere

The eCenter Viewer can be strategically positioned virtually anywhere needed, such as lounges or corridors, as required by users. It enables the display of patient information from one or multiple Central Stations, giving hospital managers the critical insights they need to strategically allocate human resources, thereby enhancing operational efficiency and patient care right where it counts.

Mobile Station: Redefined patient information access on the fingertips

The Mobile Station is the perfect tool for both on-hospital and off-hospital monitoring via smartphone or pad. It enables users to access a range of information on the go, including real-time data,reviews, alarms, and trends. This comprehensive view of patient situations provision enabling clinicians make informed decisions no matter where they are.

Comprehensive NICU Solution

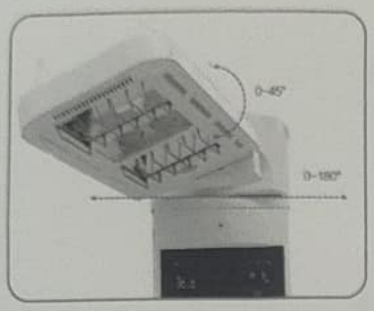

BQ80

Infant Radiant Warmer

New Neonatal Nursing and ResusCare Platform

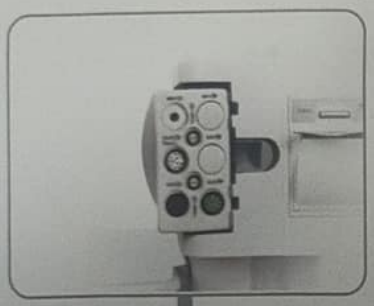

This is by far the most powerful 4 in1 neonatal resuscitation and open caring platform. The BQ80 integrates four key systems to achieve one-stop operation and management throughout the whole transition and stabilization period. At the same time, it scientifically optimizes the workflow, helps medical staff to easily respond to urgent medical needs, effectively saves the valuable rescue time, and provides comprehensive and meticulous care for newborns.

Warming

Quick pre-warm, heat evenly distributed, effective radiant warming

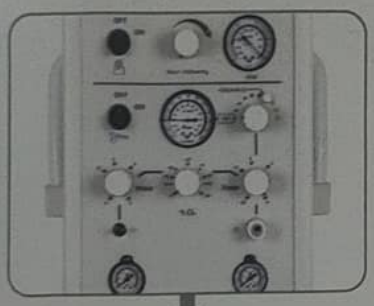

Dual ceramic heating tube with and reflector with higher light utilization rate

Monitoring

Integrated multi-parameter monitor for better concentration and organization

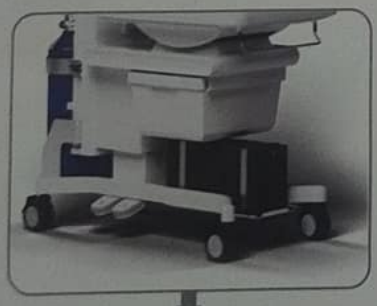

Plug-and-play modular monitor, also suitable for transport and incubators

Resuscitation

3 independent outlet of PPV+Suction+Oxygen therapy for efficient resuscitation

Pure mechanical, override pressure prevention, wall/cylinder gas inlet available

Transport

Gas cylinder holders and UPS mounting solution for intrahospital mobility

~30mins of transport running time

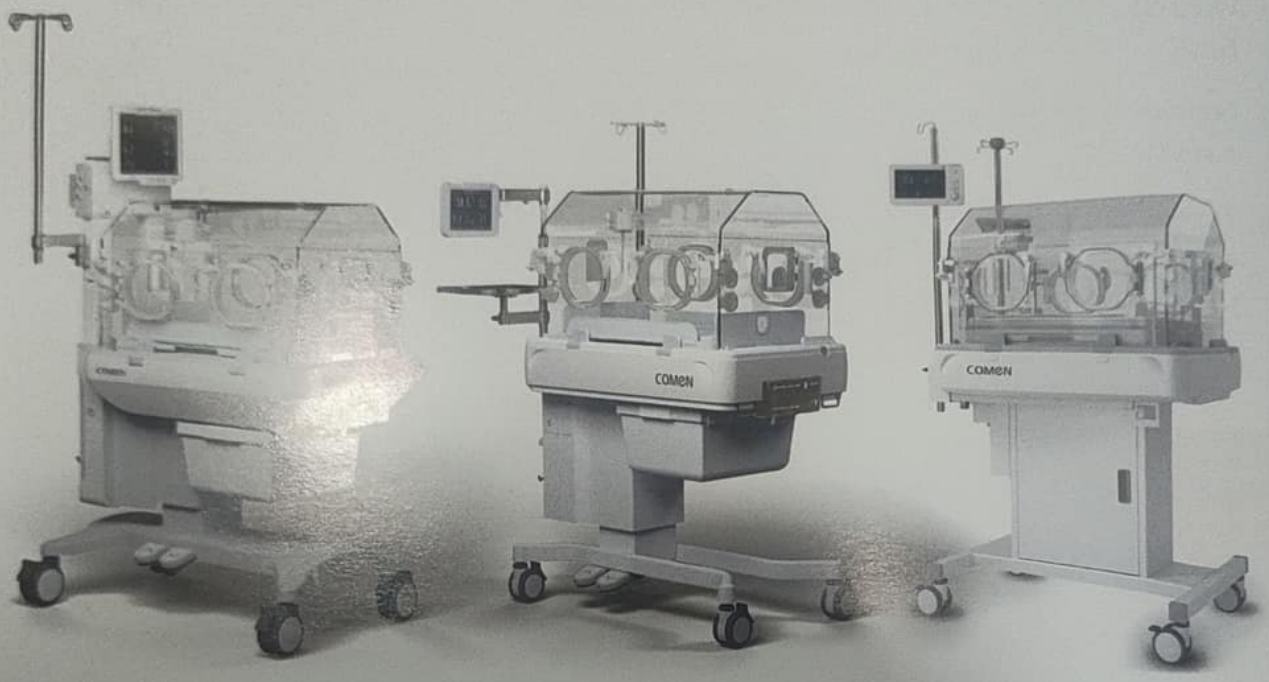

Phototherapy

Integrated phototherapy for continuous jaundice treatment in open care environment

3 level adjustable, optimal intensity, long life span, large effective treatment area

B Series Neonatal Incubator

B6/B8 B5/B3 B2

Specialized Modular Monitor

- Plug & play transportational monitor for seamless data from birth to discharged
- Integrated display with interconnection to increase working convenience
- Specialized algorithsm for neonatal ECG/NIBP/SpO2 detection sensitivity and accuracy
- Patented apnea detect and wake-up solution to safeguad neonates' spontaneous breath and nourish future growth

ExNeo®

Adap- DSP®

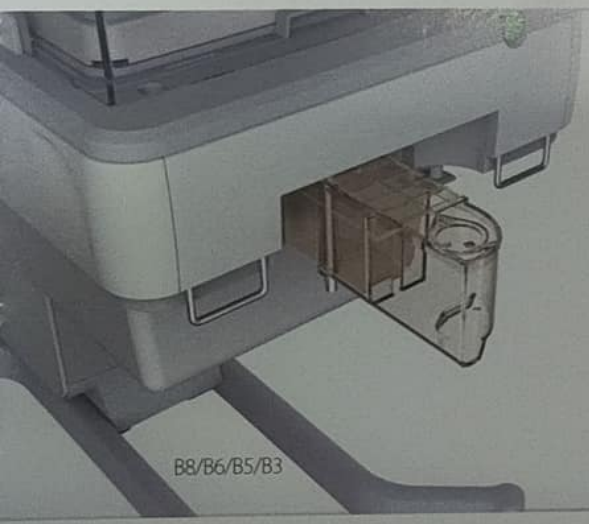

Apnea self- saving

Sufficient and accurate thermal regulation

- Wolrd-class precise temperture and humidity control to ensure better temperature uniformity ≤0.5 ℃
- Get ready for new admission quickly with swift warm-up and humidifying rate
- 7 temperature sensors, thinner probes, cascade PID algorthism and fine-tuned air delivery chamber for excellent monitoring and control accuracy narrow to ±0.2 ℃

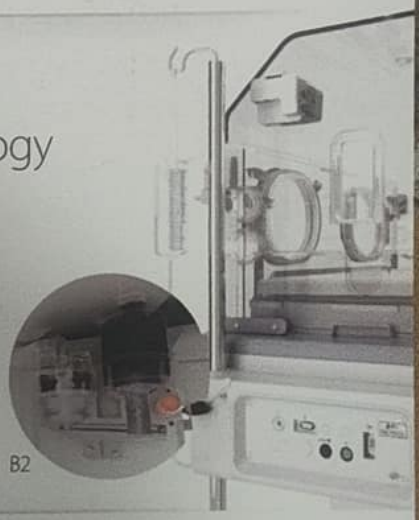

B8/B6/B5/B3

Humidity Control Technology

Efficient Humidity Control System

Maximum humidity setting: up to 99%

Accuracy: ±5%

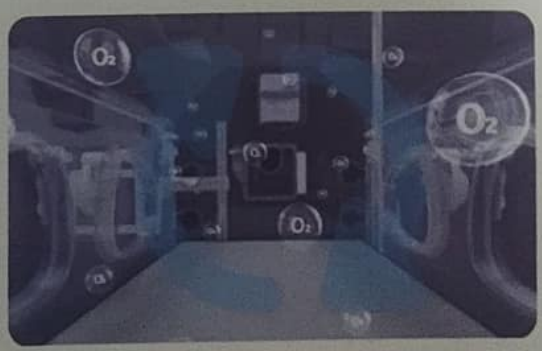

B2

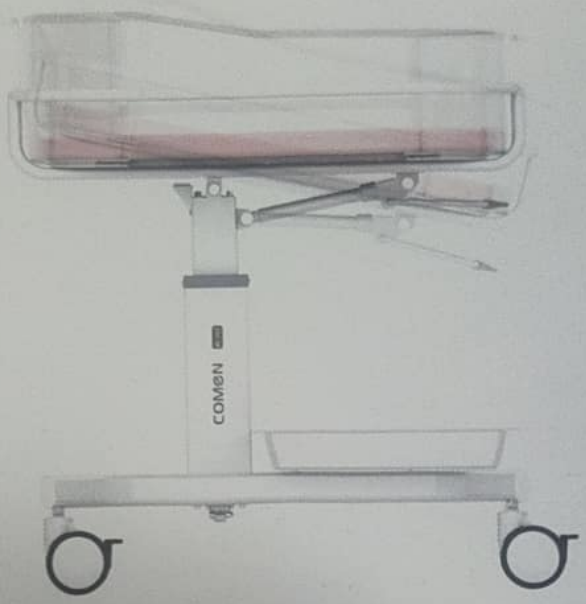

Oxygen Control Technology

Servo Oxygen Supply and SpO2 Monitoring

Closed-Loop Servo Oxygen Control supplements neonates with O_2 enrichment within the incubator through real-time feedback of Oxygen parameters.

BC Series
Neonatal Incubator

Clear vision

The transparent bedside walls provide mom a clear,easy view of baby, enabling eye contact.With well design and fine material, it is the best choice for baby care.

Better Air Circulation

Bottom holes designed for air circulation through the mattress and bassinet.

Meticulous design

The pressing handle allows the bassinet bed to be tilted at any angle between 0° to 12°, preventing regurgitating milk and reducing mom's worries.

Flexible height

Adjustable height is able to meet different nursing needs.

Convenience storage

Featuring large space, easy disinfection, the basket allows infant caring within reach.

Quiet and stable

Medical locking caster wheels enable baby to sleep soundly and sweetly even during transportation.

BL70

Infant Phototherapy Equipment

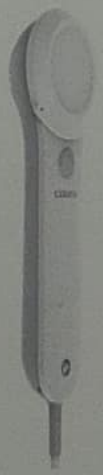

High-intensity irradiance

- Equipped with high-intensity LED cold light source, with less heat production, BL70 supports long-time treatment.
- With the maximal irradiance level of 63μW/cm²/nm, BL70 enhances the bilirubin breakdown ability and shortens the treatment time.
- With five levels irradiance adjustment, BL70 allows treatment tailored to each patient's need.

Precise Treatment for Neonatal Jaundice

Equipped with an irradiance probe to accurately measure the irradiance value and ensures that the baby receives enough irradiance, achieving precise treatment.

Irradiance probe

After height adjustment, current phototherapy irradiance value of 5 levels can be displayed on the screen.

Precise positioning

Using unique red light precise positioning, BL70 ensures correct position of the baby.

Ward round assistance

When doctor doing ward checking, it is unnecessary to take off the cover, and check neonates condition through the screen in real time.

P3/P6

Temperature control system

New Neonatal Nursing and Rescue Platform

Induction[①]

Rapid cooling through the use of cooling blankets to reach a core body temperature of 33°C to 34°C within 2 hours.

The P6 utilises innovative Semiconductor Cooling Technology to rapidly meet target temperatures.

Maintenance[①]

Maintains newborns' core body temperature at 33.5°C to 34°C for 72 hours.

Safety through Real-Time Monitoring to reduce the accidental occurrence of complications.

Rewarming[①]

Recovers newborns core body temperature to 37°C at 0.5°C/·2 hours with normothermia maintenance.

The P6's exceptional Intelligent Gradient Warming System accommodates most clinical settings to provide Comfort and Ease of Access.

① ; Seetha Shankaran . Therapeutic Hypothermia for Neonatal Encephalopathy 2013 Dec 1. Curr Treat Options Neurol. 2012 Dec; 14(6): 608–619.

New Neonatal Nursing and Rescue Platform

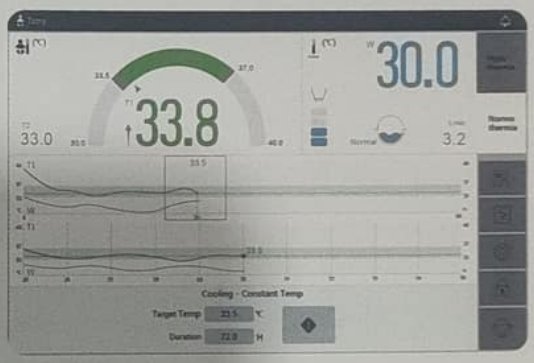

P3/P6's intelligent closed-loop temperature control system automatically adjusts water temperature based on the monitored patient's core temp. The monitoring of the patient (both skin & core), water temperature ensures the safety throughout treatment, rewarming and maintenance while also avoiding other complications caused by long-term hypothermia.

Quick access buttons on the side of the screen allows caregivers to easily switch between Hypothermia mode and Normothermia mode, tailored for versatility without the hassle when attending to patients' needs.

- Hypothermia Mode comes with an Intelligent Automatic Transition from Cooling-Maintenance treatment to Rewarming when Auto Mode is selected.
- Normothermia Mode is applicable during surgery to help patients maintain stable temperatures, tailored to best meet every unique surgical stuation.

Hypothermia mode

Normothermia mode

Round-the-clock Protection through Modular Monitoring

Unexpected complications in newborns receiving therapeutic hypothermia can be overwhelming and stressful due to the influence it has on their cardiopulmonary system, which is why, to lighten caregivers' load, we provide constant monitoring of vital signs to ensure that nothing goes unnoticed.

NV10/9/8/7
Neonatal Ventilator

Increase NIV Confidence Further than Ever

COMEN NV Series includes a complete NIV set with specialized ventilation tools for neonates and children, expanding the ventilation strategies to protect each spontaneous breath. It offers a robust ventilation system and elevates oxygenation level at all stages.

HFNC + ROX

ROX index to optimize ventilation strategy.

nCPAP + Apnea Auto-relief

Preset compulsory pressure-controlled ventilation after apnea detected

DuoVent

Increase mean airway pressure (MAP) while maintain free breath.

2 Sync SNIPPV + Back Up Vent

Selectable synchronization methods to catch the breath at all times.

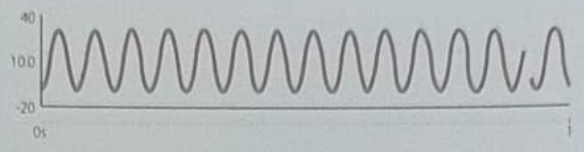

NIPPV

Sustained alveolar ventilation during episodes of apnea

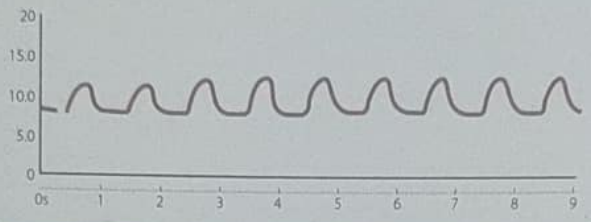

Single-limb nHFO

Patented diaphragm ocssilator with single-limb ventilation to create a safety net for NIV

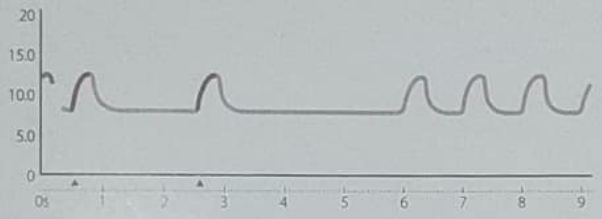

nHFO

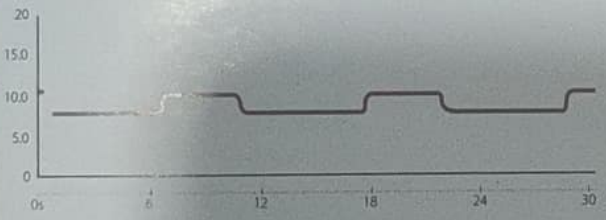

NIPPV

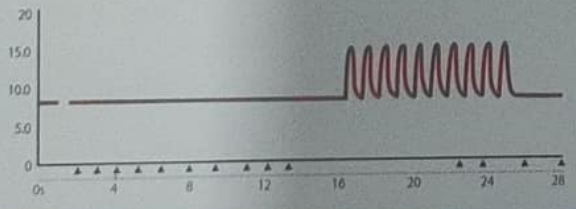

SNIPPV

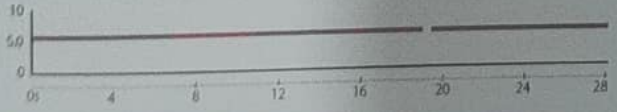

DuoVent

nCPAP

HFNC

All COMEN, with Well- Rounded Consideration

COMEN povides its own brand of ventilation accessories, protecting gas flow in every step. Fine-tuned structure with carefully selected material, increase comfortness, reducing dead space and work of breath (WOB).

Patient Interface

NV Flow

- Flow driver w/ nasal prongs or masks

  Applicable for nCPAP/(S)NIPPV/nHFO
- Sensible for synchronization

Nasal prongs and masks

- Effective seal and minimize leaks while prevent nasal injuries
- Ergonomically design and soft silicon for best position and comfort

Headgear

- Prevent nasal damage: Prong/mask are fixed by straps horizontal to nostrils, reducing upward pulling force on the infant's nose.

Neo.flow

- Soft, anatomically curved cannula to lower airflow resistance and has a tendency for reduced nasal trauma

RN2-201H

RN2-101H

Disaposable heated neonatal breathing circuit with disaposable humidifacation chamber

Disaposable neonatal breathing circuit (water cup included) with disaposable humidifacation chamber

- Single limb and dual-limb adaptable
- Optimal structure with less dead space

CM-V20-001 /CM-V21-001R

Reusable neontal humidification chamber

Disposable neontal humidification chamber

(Auto feeding)

HT50/HT30

Non-invasive heated humidifier

Invasive heated humidifier

- Less condensation
- Sensible detection of small air flow
- Easy operation

KL-20
Medical Air / Oxygen Blender

An independent gas mixer receiving separate oxygen source and air source, and delivering mixed gas with adjustable oxygen concentration and volume;

Incorporate humidifier and oxygen tube/pressure generator into oxygen apparatus/CPAP machine.

NV6
Neonatal Ventilator

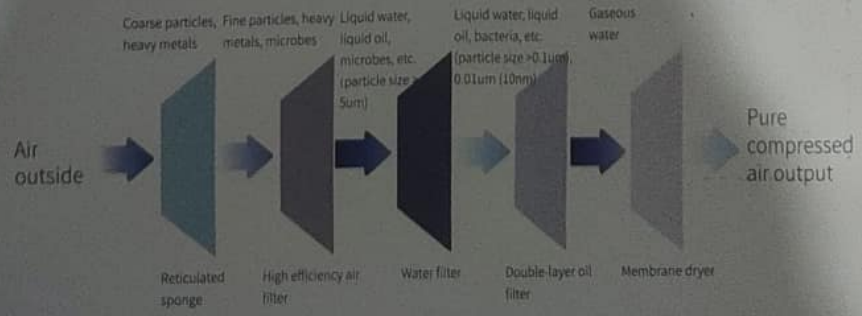

Bubble CPAP not only provides CPAP ventilation therapy, but also it is unique care for patients lies in that the high frequency vibration bubble makes the airflow of entering into patient's respiratory system produce high frequency oscillation, so that it gives a quick tap for the lung of patient, hence to improve the respiratory function, reduce the amount of dead space, advance expectoration and speed recovery.

With HFNC high flow O2 theraphy, NV6 is easier to use and able to aviod damage to the patients.

VS-20
Pure And Ultra-quiet

VS-20 applies high-effective filtering technology to provide pure compressed air.

Comprehensive OR Solution

AX-900

Anesthesia Machine

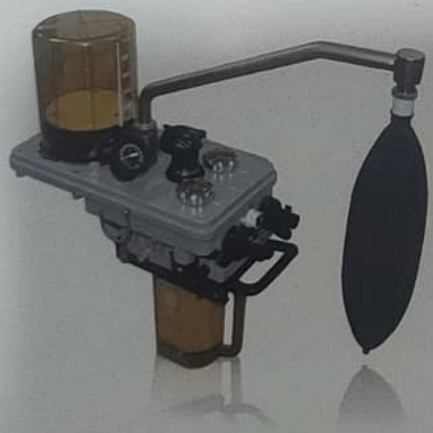

Dual-Screen Design

- 15- inch four- way rotating touch screen: Facilitates operators of different heights to observe in real time and operate accordingly.
- Reasonable partitions of configuration parameters and monitoring parameters; all the observations and operations can be completed within 2- level menu.
- 8-inch integrated screen solely for electronic flow meter.
- Bookmark menu that is self-explanatory and easy to use.

Full electronic flow control system

- Full electronic flow control system
- Fully electronically controlled fresh gas flow greatly improves accuracy of flow and oxygen concentration.
- Closed- loop oxygen concentration control technology: The user directly configures the oxygen concentration and total volume of flow. The system automatically matches the ratio and dynamically calibrated it in real time.
- Best flow indicator tool: scientifically guide the clinical implementation of low- flow anesthesia while saving costs.
- Fully electronic gas source control system: electronic monitoring of gas source pressure; once there is overpressure or underpressure, the electronic system would respond quickly.
- Negative pressure expectoration system: no need of negative pressure source; the equipment is converted to negative pressure through the Venturi effect and positive air pressure, and the flow can be adjusted independently.
- [illegible] new auxiliary oxygen supply system: support off-line operation; fast oxygen therapy; [illegible]oduce gas of any volume of oxygen concentration.
- [illegible]gh pressure oxygen source can support the rescue ventilator.

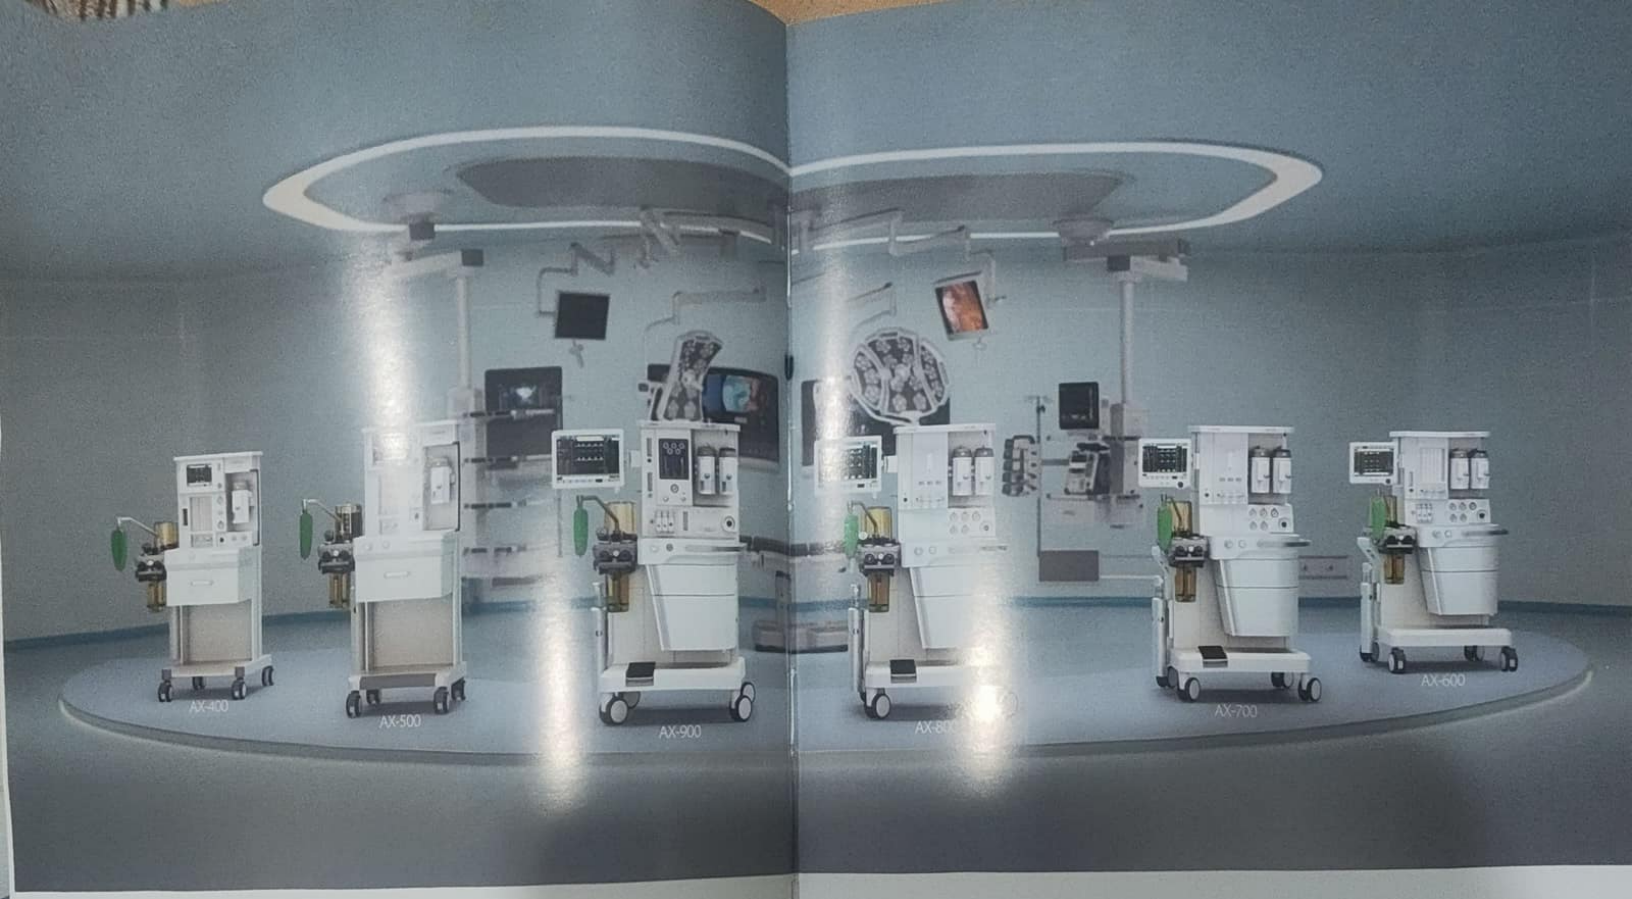

The minimum tidal volume down to 5ml under PCV mode

7% high accuracy ventilation

Breathing circuit leakage as low as 75ml/min

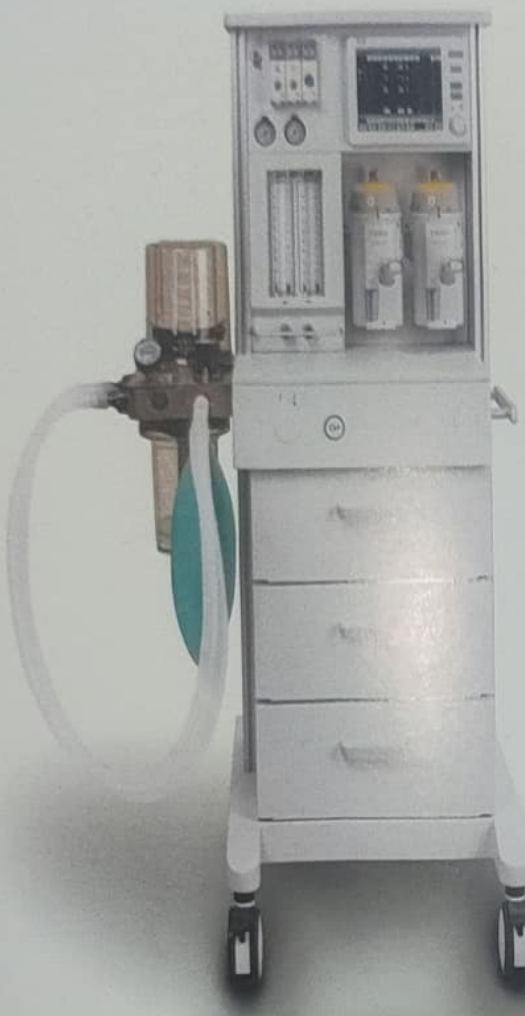

Breathing circuit

- Compact and integrated design with circuit leakage volume of less than 75ml/min.
- Improve the safety and convenience of system use.
- Made of PPSU material that is corrosion resistant, durable and autoclavable.
- Easy disassembly and disinfection and hence less maintenance time required.
- With by-pass technology, the CO2 canister can be changed during the operation without leakage problems and the built-in heater can eliminates internal water condensation effectively.

Anesthesia Machine Family

From economical options to high-end choices, Comen has the capability to support all types of respiratory demands and provide all range of anesthesiology solutions.

A5/A7

Anesthesia Machine

Ergonomic Operation Platform

- 8.4-inch touch screen displays up to five waveforms simultaneously.
- Three-drawer design provides caregivers with a larger medical accessorie storage space.
- 0-15 l/min Dual-channel mechanical flowmeter allows a wider flow adjustment
- Three-slot modular design supports more high-end parameters monitoring including AG+O2, AG, BIS, CO2 and NMT.
- A7 includes advanced auxiliary tools to facilitate operation: Flush O2, ACGO, AGSS etc.

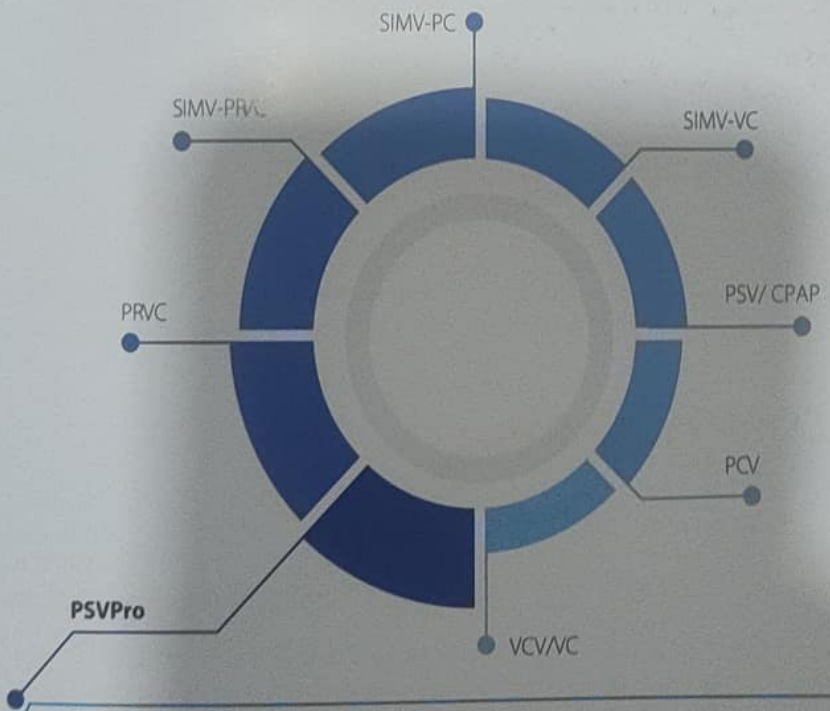

Compact & Precise Breathing Circuit

- The highly integrated breathing circuit design reduces the air resistance of the breathing circuit effectively.
- APL valve can quickly exhausts the pressure in the circuit to the lowest value, which ensures patient's safety under manual ventilation.
- With by-pass technology, the CO2 canister can be changed during the operation without leakage problems.

Comprehensive Ventilation Support

Extensive ventilation mode selections can satisfy clinical demands for entire perioperative period and provide safe, efficient and comfortable ventilation support for the patients.

PSVPro: Advanced and high-end ventilation mode, is designed to give smarter and more efficient pressure support for the patient.

L9

Exquisite LED Surgical Light

Illuminate Brilliance, Preserve Vision

As the third-generation surgical light from Comen, the lamp head of the L9 shines like a twelve-arrow diamond, symbolizing not only its exquisite appearance design but also its top-notch quality.Its optical brilliance reaches new heights, offering practical clinical tools that enhance the efficiency of surgeons. Pioneering with its human-centric design, this model sets new standards in the industry, providing an easy-to-use, reliable, and exceptional surgical light experience.

Exquisite Aesthetics

- Compatible with Laminar Flow
- Passed DIN-1946 Test
- Seamless Design

Eyes-protection Illumination

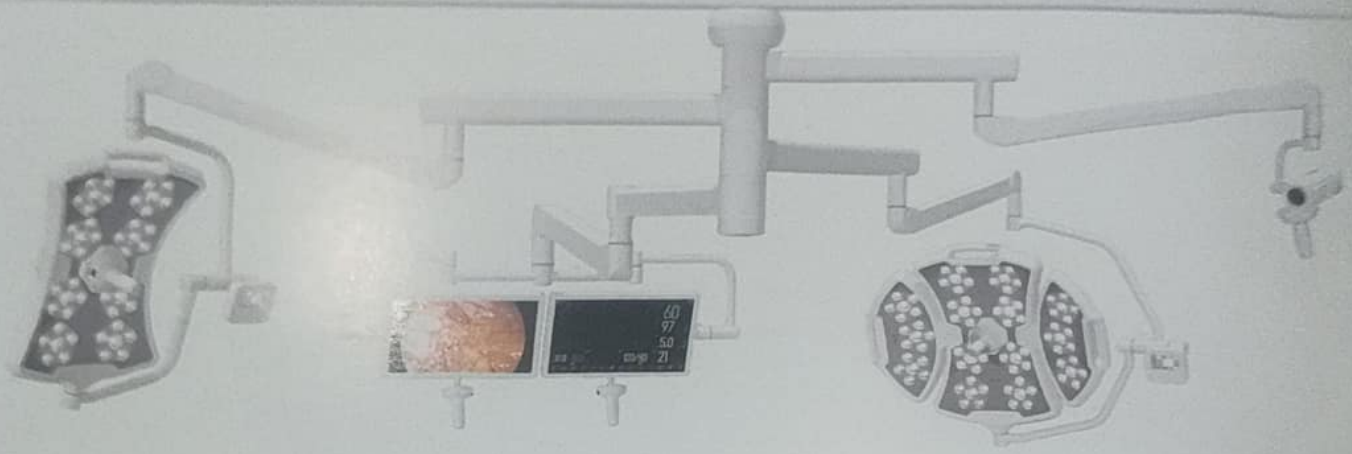

- DC Diming Technology
- Eyes-protection Mode
- Multi-color Endo Mode

Effective Illumination

- Elliptical Spot for Cardiac Surgery
- Adaptive Illumination -Auto Focus
- Multi-functional Handle

L6SC

LED Surgical Light

L6SC is a high-end surgical light from COMEN that can deliver highly effective lighting during surgical operation, so surgeons will obtain clear view of targeted wounds without vision being obscured.

Constant and stable illumination

100% shadowless rate

Quality hardware

6 Major Outstanding Features of L6SC

Smart Intensity

Intelligent Shadow Management System

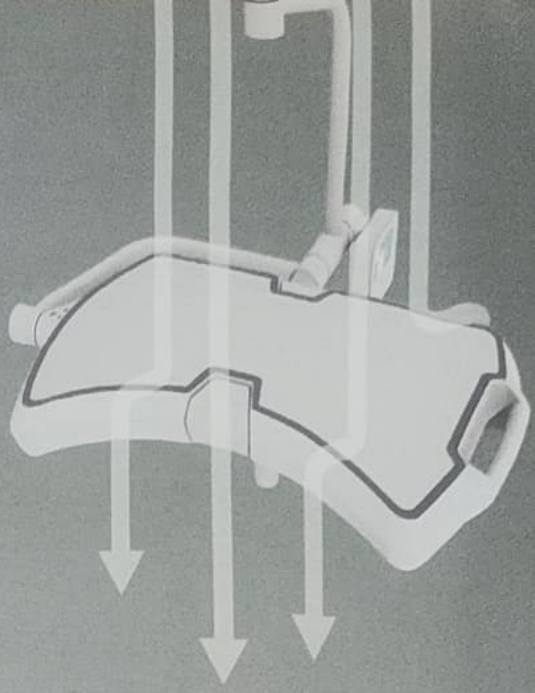

Adaptive Lighting

Adjustable Color Temperature

Elliptical Spot

True-to-life Color Representation

The light panel of L6SC adopts arc and hallow out design to avoid dust forming and assist laminar flow

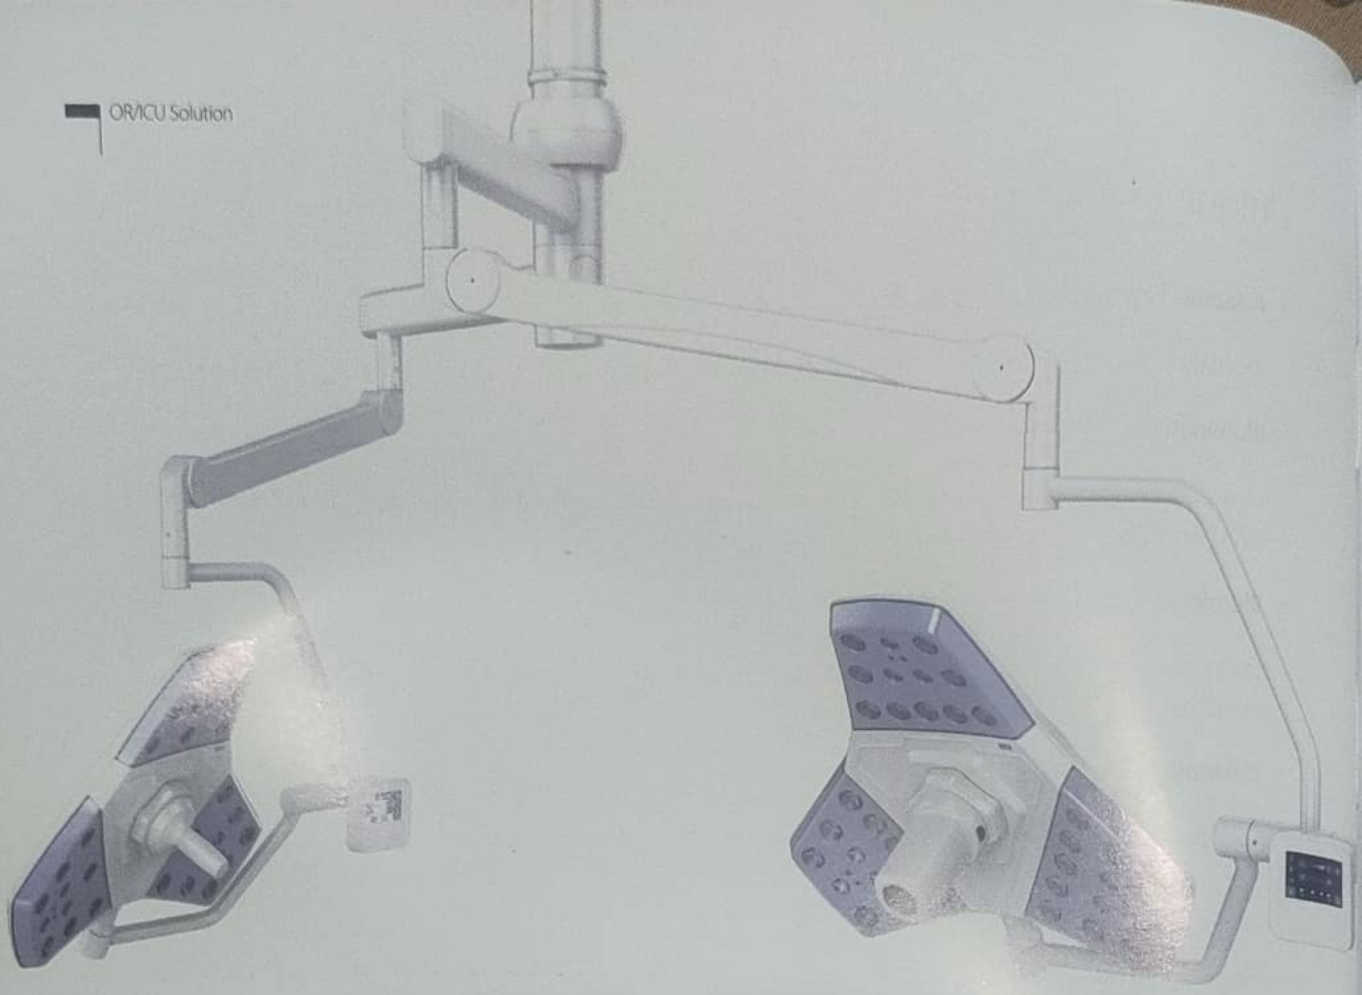

End-User Oriented Design

L6SC is the first surgical light that takes operator's optical health into consideration. L6SC adopts a DC dimming technology, which reduces visual fatigue by eliminating high-frequency flash and removes ripple waves during video recording.

Durable LED light bulb

Up to 70,000hours service lifetime

L5

Surgical Light

Powerful independent working function

- Lamps' Lifespan up to 70,000 hours, , more durable than ever
- Central Illumination: 160,000 lux/120,000 lux, 3 modes meet various of surgery requirements
- Max. depth of Illumination : 1,300 mm
- Lower power consumption

Unique Function

- **Adaptive Lighting Technology**

  25cm up/down movement of the surgical lamp will no change the illumination under the specified illuminance

- **Illumination stabilization technology**

  L5 adopts DC dimming technology, that means it can protect the surgeon's eyes from the flickers of the traditional PWM dimming, what's more, it will no cause the waves during filming

- **Illumination capacity technology**

  Spot size will not change while the illuminance was changing, to make it more convenient for medical staff operation.

- **Customized configuration**

  L5 allows operator to save 3 customized settings to reduce unnecessary adjustment.

L3

Surgical Light

Economically Quality-Ensured Choice surgical light

- The Ra of L3 is up to 98, which enables truest color presentation of the wound.
- Lamp lifespan is up to 70,000 hours, more durable than ever
- Endoscopy mode with optional green light or white light selection based on surgeon's operating preference.

LM Series

Mobile Surgical Light

L5-AM/L5-BM/L6SC-AM/L9/L9-AM/L9-BM

Adjustable Angle

LM series is equipped with a flexible rotatable mechanical arm to better accommodate different operating demands.

Smooth Movement

Eliminates the hassles for installation.

Slim and streamlined stand design can be easily fit into any tight workspaces.

Built-in Battery

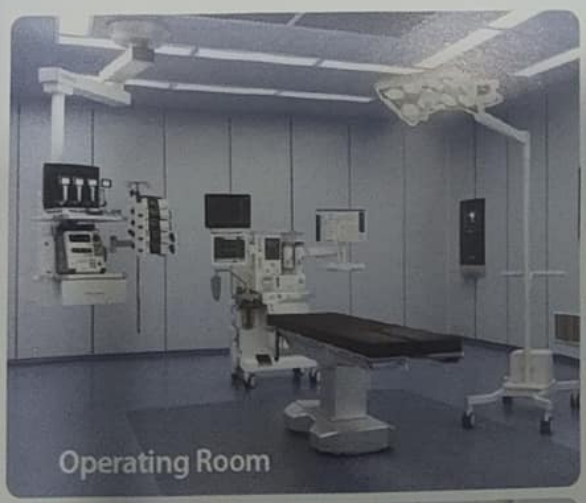

All LM series models are equipped with built-in battery, so they can provide up to 4 hours of illumination even without power supply. Therefore, LM series can greatly facilitate intra-hospital transport in case of unexpected power outrages.

Anywhere
Anytime

Unlike traditional surgical light, the LM series mobile surgical light could be easily assembled and used in various settings and diverse hospital environments. Maneuverability of the LM series just became easier and effortless with its mobile st[illegible]nd large capacity.

The LM s[illegible]obile surgical lights are suitable for different clinical practices, including but not limited to operating rooms, ob[illegible]cs departments, dental clinics, aesthetic and beauty centers and veterinarian hospitals.

Adaptive for Various Clinical Scenarios

Operating Room

Obsteric Department

Consulting Room

Veterinary Hospital

WE1/WE2

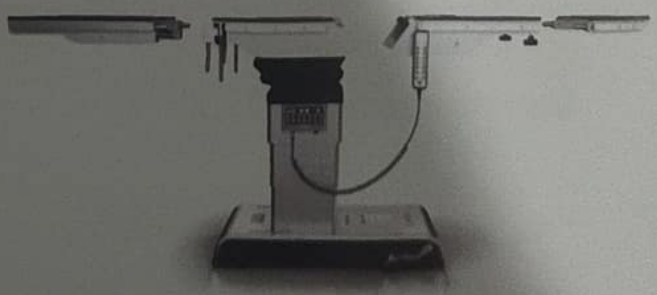

Electric Operating Table

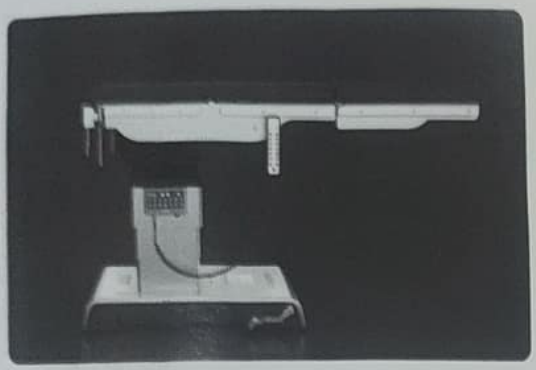

WH1/WH2

Electro-hydraulic Operating Table

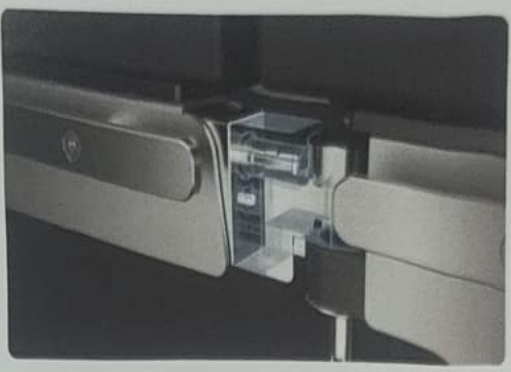

Modular Design for Flexible Positions

The WE series and WH series operating table features a modular design, allowing for flexible configuration to meet diverse surgical requirements.

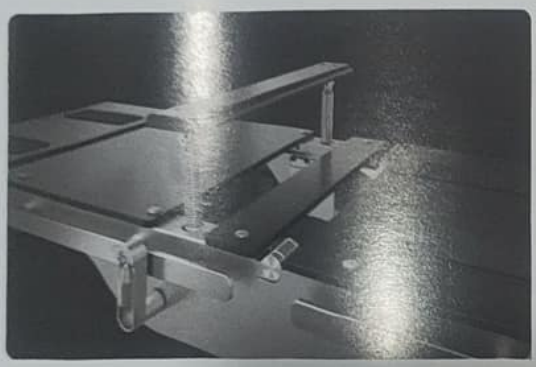

Supporting the sliding and allowing the exchange of head and leg plates, WE series and WH series is allowed full access for C-arms

Quick-plug connection for easy assembling of plates

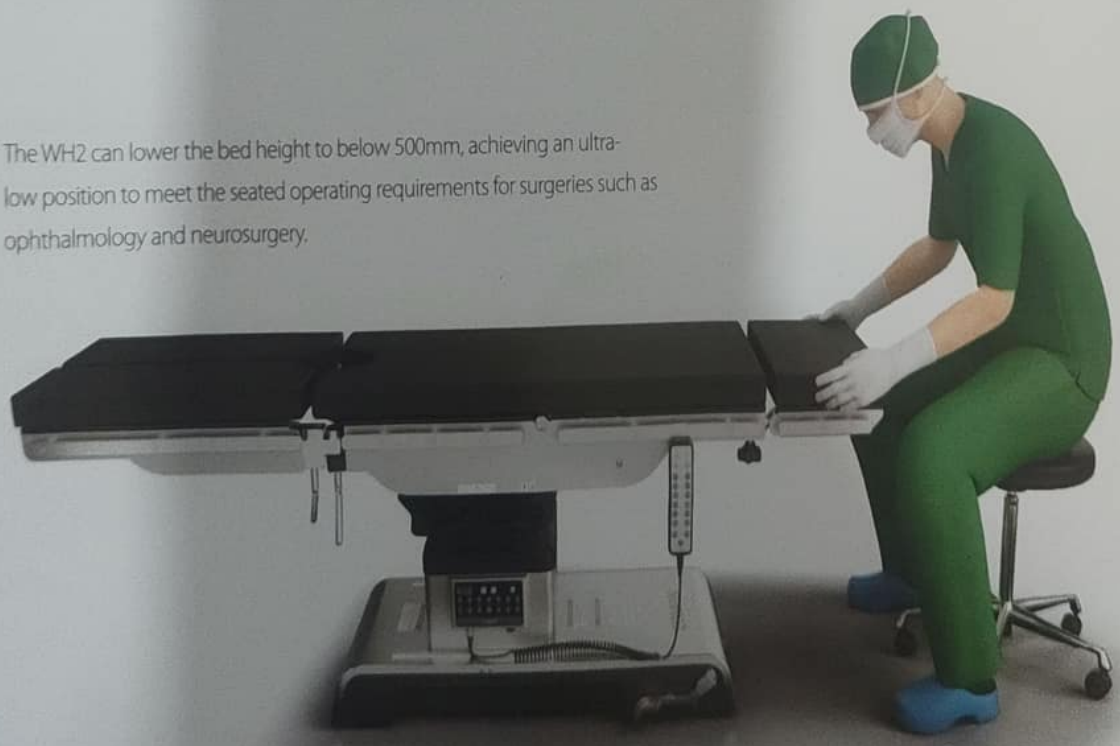

Kidney bridge allows up and down adjustment from 0 mm to 130 mm

Two options of brake types: mechanic brake or electric brake

The WH2 can lower the bed height to below 500mm, achieving an ultra-low position to meet the seated operating requirements for surgeries such as ophthalmology and neurosurgery.

D7 Ceiling Pendant

D5 Ceiling Pendant

Adopting complex porthole die technology on the arm;

Profile section's thickness is up to 17.68mm;

Tensile strength is 285N/mm2;

Yield strength is 234N/mm2;

Passed strict maximum loading test(2.72ton).

Switzerland SKF high

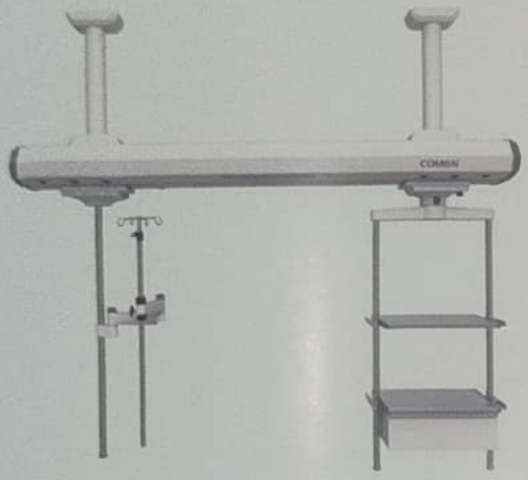

Strength bearings, with quiet, smooth running and long-term reliability dvantages.

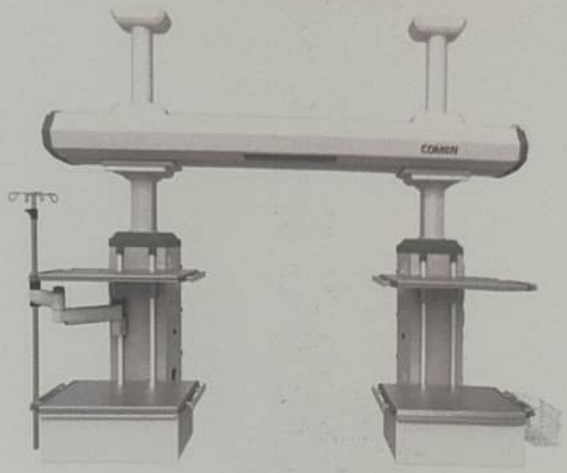

Service life of the bearing

About 10000-250000 hours

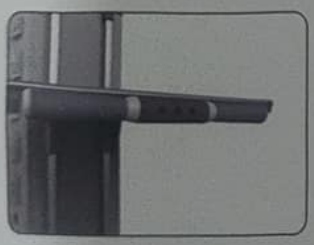

Combining with the SKF lifting technology from Switzerland; Its lifting mechanism can bear heavy load and support lifting distance working, enabling free and easy movement with direction orientation function in the driving system.

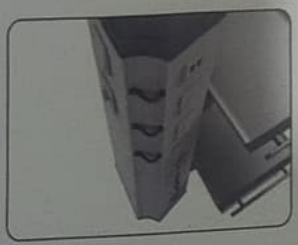

D9 ICU Beam

Use AL6061 aluminum, better performance with the oxidation protection treatment on the surface.

Air source terminal passed plug durability test(30000 times).

Passed strict pressure test

The engineer fully considerate the structure while designing the performance of the cabinet. Cable management and storage tank design make it more compact.

The interfaces of the gas sources and power supply is designed to maximize the space utilization.

Drag chain design to prevent air leakage caused by gas circuit turning and short circuit caused by cable damage.

Double bearing and double track design enable more stable of translation.

The reading lamp was designed for enable patients to read in the evening, no influence to other patients.

Multi-color backlight design help meet with patients of different backlight color preference.

Smart Theater

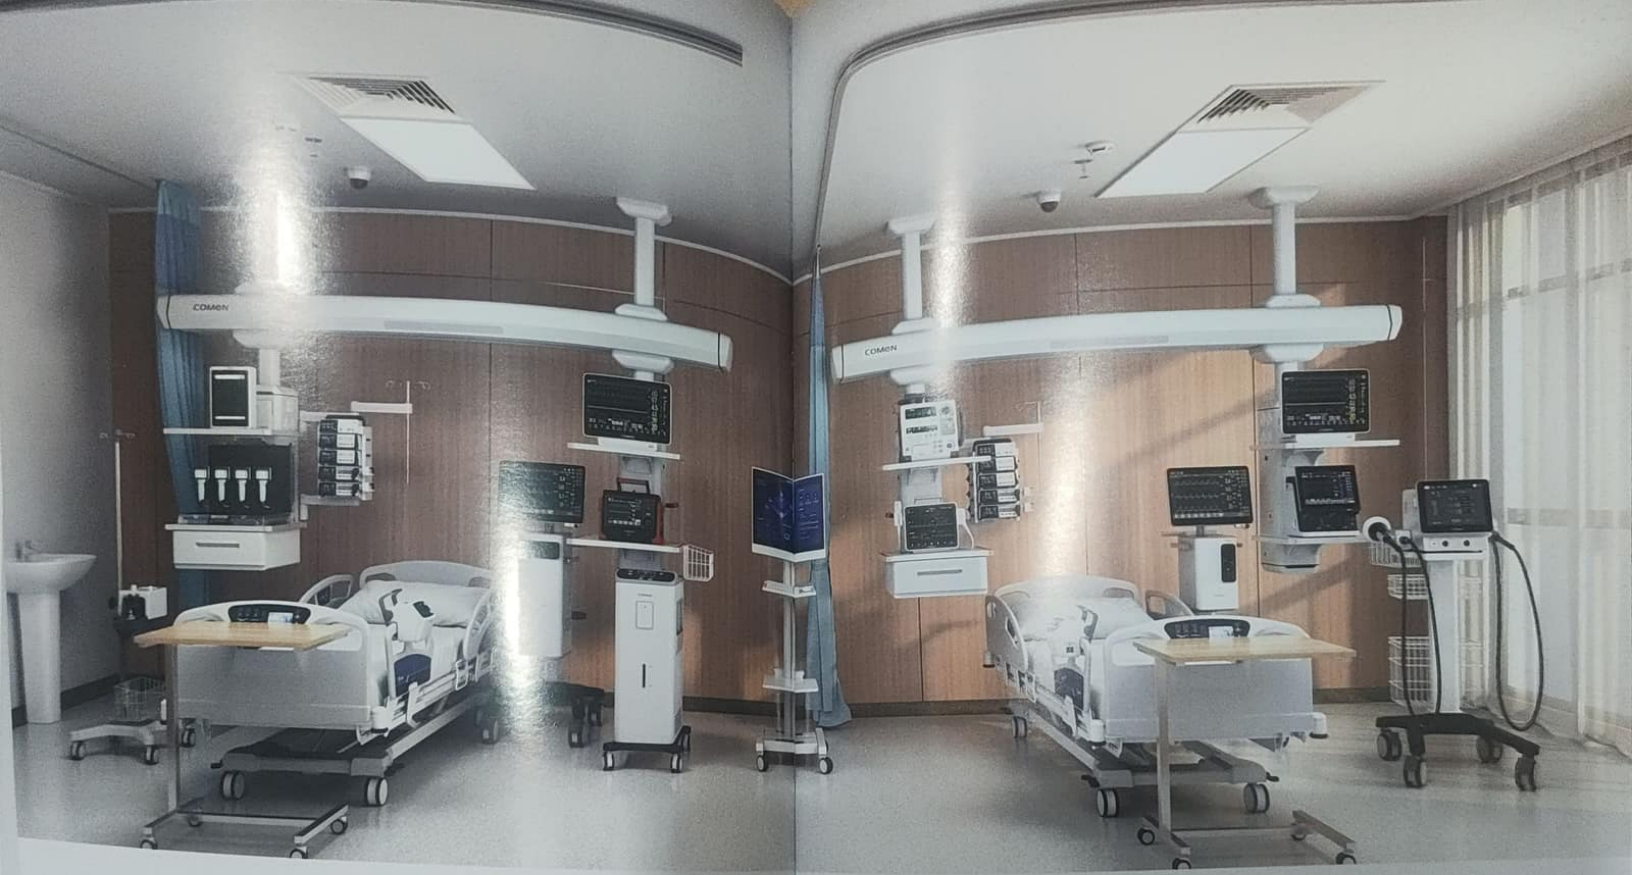

A gateway to the smooth operation

Device integration
Everything is under control

Data transmission
Can be connected to hospital PACS, HIS and other systems

Teaching support
4K HD video recording and huge storage archiving

Remote consultation
5G data transmission to achieve the lowest delay

Comprehensive ICU Solution

V8

ICU Ventilator

Efficacious Oxygenation
Precise Evaluation

ROX

Provide accurate evaluation for patient who is receiving HFNC treatment

OSI

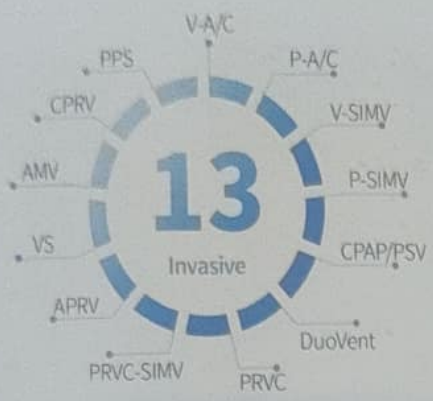

Provide accurate evaluation for ARDS

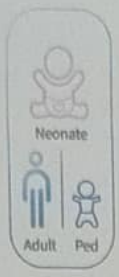

RSS

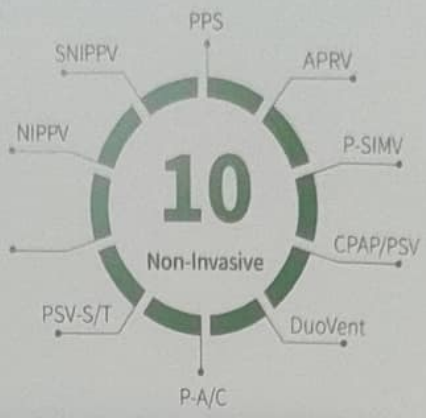

Important reference for respiratory disease

S/F

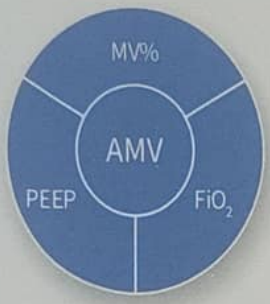

Assist oxygenation index assessment in the absence of arterial blood gas analyzer

Advanced Breathing Support

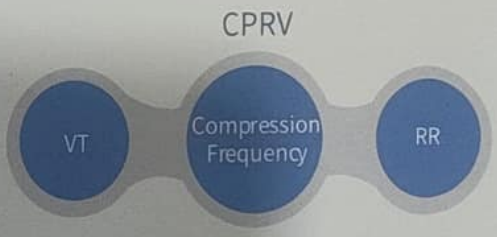

CPR Assisting Tool

Facilitate clinical CPR process

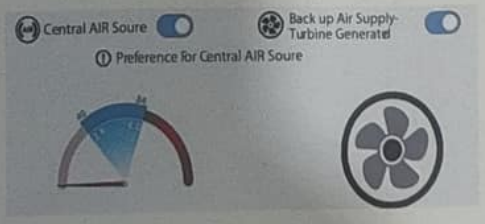

- Two-step Activation
- Shield non-related alarm

Double Drive System

Peumatic Driven + Electric Driven

Powerful Gas Delivery System

Standby AIR Gas source

High-performance VS-10 Turbine

Faster response | Lower noise

Longer life span | Maximum flow rate ≥ 210L/min

NV50/60/70

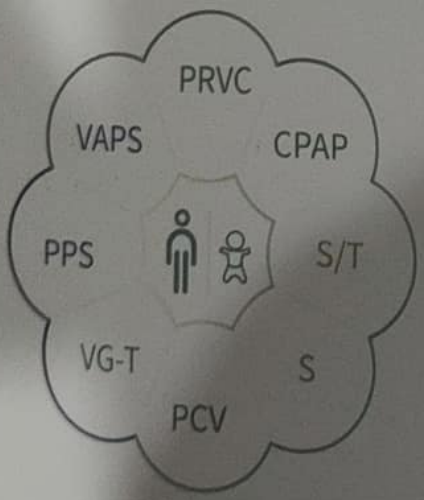

Non-invasive Ventilator

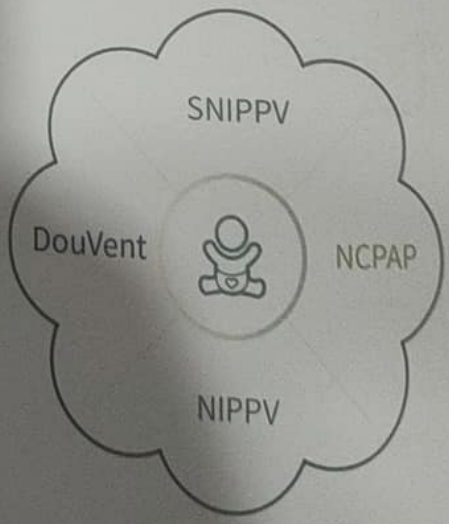

NV50 NV70 NV60

Focus on Non-Invasive Respiratory Support

NIV for All Age Groups

Adult/Pediatric

Neonate

NV70 is Comen's NIV ventilators for all age groups.

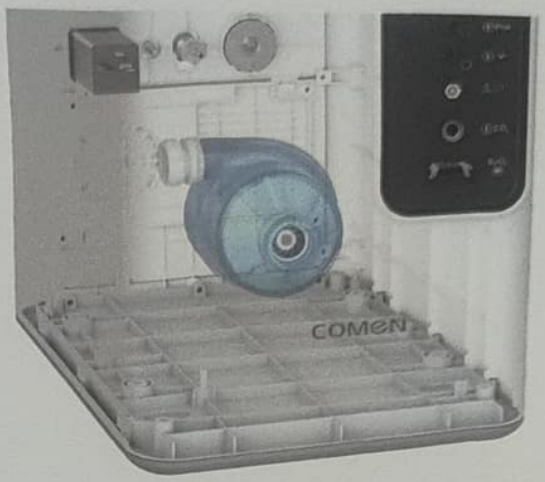

With high-level human-machine synchronization technology and strong leak compensation, NV70 shows excellent performance in NIV support.

Robust Turbine for Effectiveness

Increased peak flow rate

Elevated delivery pressure

Enhanced accuracy in leakage compensation

High Synchronization, Breathing as Casual

iV -Cycle

Functions for fast-response Trigger

- iV-Cycle is the upgraded synchronization technology.

  During the ventilation process, NV70 extracts and analyzes the patient's pressure waveform characteristics and adaptively adjusts the patient's trigger sensitivity of inspiration and expiration.

Functions for Smooth Switch

- The pressure can be gradually increased to the set value within a predetermined time. For patients with poor pressure tolerance, they can gradually adapt to pressure.

- It follows each breath automatically, determines the best exhalation switching point based on the patient's respiratory airflow for CPAP Exhalation pressure relief

V3

ICU Ventilator

Extensive Respiratory Management

V3 has a comprehensive range of ventilation modes and special features that meet the requirements of intensive care respiratory therapy.

It fully supports the various treatment needs of ICU, PACU, RICU, EICU, PICU and other wards.

Ventilation modes:	Invasive ventilation mode	• V- A/C	• V- SIMV		Non-invasive ventilation mode	• P- A/CP	• - SIMV
		• P- A/C	• P- SIMV	• CPAP/PSV		• CPAP/PSV	• High flow oxygen therapy
Respiratory Respiration Assisting tools:	Assisted ventilation	• Manual breathing	• Exhalation- hold	• Inhalation- hold	Smart ventilation	• Compliance compensation	• Leakage compensation
		• Nebulizer	• Oxygen enrichment (+O2)	• Sputum suction		• IntelliSynTec	• Apnea ventilation mode
Monitoring function:	Waveform monitoring	• P- T waveform	• F- T waveform	• V- T waveform	• Wavefrom chart		
		• P- V loop	• F- V loop	• F- P loop	• Wavefrom chart		

V2/V5

ICU Ventilator

V5 is a leading model in turbine-driven ventilators. It is suitable for all age groups, including adults, pediatrics, and neonates. It also allows for the use of a single-limb breathing circuit for better newborn support.

With 18 ventilation modes available, it can assist patients in various stages, from intubation to weaning, invasive to non-invasive ventilation, and even during high-flow oxygen therapy.

Comprehensive ventilation modes

- 13 invasive ventilation modes
- 10 noninvasive ventilation modes

All-round Clinical tools

- Lung Protection kit: C20/C, Stress Index, VT/IBW, PV-Tool
- Oxygen Therapy kit: ROX, S/F, RSS, OSI
- Calculation Kit: Energy metabolism calculation for better ICU nutrition support
- Weaning Kit: RSBI, P0.1, NIF, and SBT

V1

Transport Ventilator

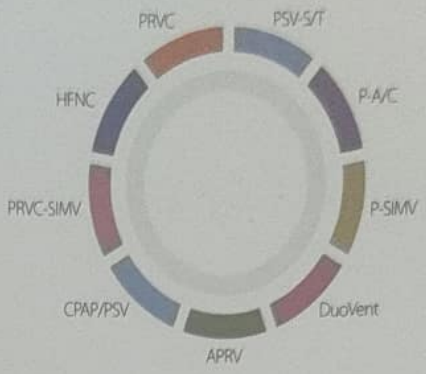

High-performance Turbine

The integrated high-performance turbine provides pneumatic performance that can match any compressed-airbased ICU ventilator. The built-in power unit can not only generate higher pressure but also support continuous O2 concentration.

Advanced Tools
ICU-grade support

Most Comprehensive Ventilation Mode.

V1 provides same ventilation mode as ICU ventilators. It becomes more adaptive to multi-types of patient. Which result in an efficient tool that makes different during transport.

42+ Parameters

Monitoring parameters provides immediate feedbacks which makes decision faster.

PEEPi | TVi | P0.1 | V'max | MVspn | fspn

PulmoView

The PulmoView function is an animated lung that shows compliance, patient trigger and resistance in real time.

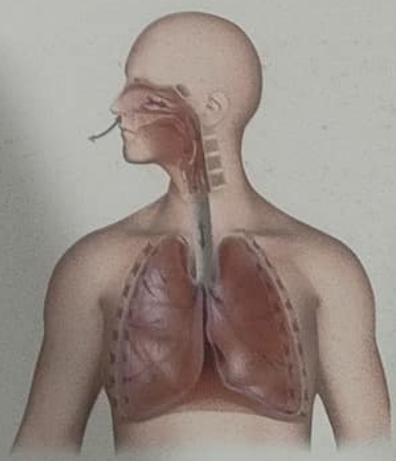

More Efficient Algorithm.

The IntelliSynTec algorithm enables smooth synchronization.

[Auto] Expiratory Trigger

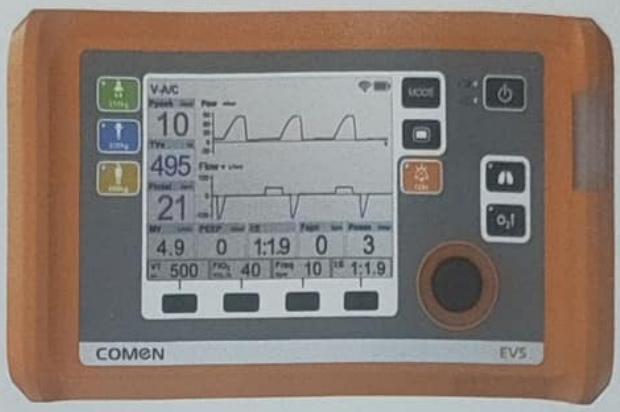

- Comfort the patient in breathing
- Improve the man-machine synchronization
- Reduce the frequency of ventilator adjustment

EV5

EV Series

Transport Ventilator

Advanced Parameters Monitoring

EV5 supports real time monitoring of SpO2 and EtCO2 during emergency transport ensures much safer and consistent ventilation.

Elaboration Improves Usability

Comen's EV5 provides responders with an in-depth overview of the patient's current ventilation status and respiratory functions through spirometry loops, establishing a reliable data basis for when prompt decision-making is required.

5 waveforms:

P-T | F-T | V-T | CO_2-T | SpO_2-T

3 pulmonary loops:

P-V | P-F | F-V

EN 1789 Certified

EV Series passed 0.75M drop test and acquires EN 1789 certificate. The EV Series accompanies your patients seamlessly whether in or outside the hospital.

IP34 Rating

Equipped with IP34 Ingress protection, the EV Series effectively prevents the ingress of liquids from any direction, especially crucial in complex outdoor environments.

EV3

- Lightweight with only 1.4KG
- 3.5" Intuitive Interface
- One Step Setting
- Intelligent Voice Guidance
- Waveform Display

EV2

- Lightweight with only 0.7KG
- One Step Setting
- Continuous monitoring of airway pressure
- Intelligent Voice Guidance

Extreme Cold Test

EV Series successfully passed the operation test in the extreme environment, and can be working even in the -16°C extreme environment.

Long-lasting Operation Support

EV3&EV5: supports up to 10 hours of continuous operation.

EV2: 130 hours with a disposable battery, and 60 hours with a rechargeable battery

SCD600

Sequential Compression System

For preventing DVT and PE

Comen disposable sleeve is designed with thin and fine TPU material, it ensures the comfort of patients during compression by addressing sweat and heat. Moreover, to improve the patient acceptance, Comen disposable sleeves can minimize sweat pooling, irritation and itching.

In addition, to provide a more durable experience for single-patient use, Comen disposable sleeve can inflate up to 5,000 circles.

Non-woven fabrics+TPU	Right foot/Single- channel/Disposable	360*420*206mm ±20mm

ight and Comfortable

Flexible and efficient workflow, SCD600 features a light body and unique clip design for handy and intuitive control experience. All of this allows for greater flexibility and comfort for both clinicians and patients.

Powerful and intelligent

Focus on patients, providing personalized treatment with intelligent compression, dynamic and visualized treatment.

Accurate and reliable

Medical- grade dual pressure sensor features real-time pressure collection and provides double overpressure protection to ensure patient safety.

The Dual CPU processor gives real-time monitoring of the entire treatment process to ensure safe and reliable treatment.

NF5

High Flow Heated Respiratory Humidifier

Simple and practical

- Ultra-Large touch screen: NF5 is equipped with a 4.3-inch touch screen, which allows easy and quick operation by touch and navigation knob.
- Electronic Air-O2 mixer system: easy to set up flow rate and O2 concentration.
- Intuitive UI design: large font, easy for caregiver to operate and observe.
- Optional SpO2 monitoring, ease evaluation of the effectiveness of HFNC.

Safe and comfortable

- High performance turbine, no need for compressed air supply
- Integrated battery for transportation
- Light and compact medical trolley ease intra-hospital transport

Safe and comfortable

- Multi-position temp monitoring: NF5 is equipped with 3 temp sensors, which enable real-time temp monitoring, synchronized closed-loop feedback, joint high temp alarm, smart water level management and over-temp protection function to ensure safer heating.
- High-performance nasal cannula: ergonomic design, soft and comfortable, free of constriction.
- Ultra-quiet design: The ultra-quiet turbine significantly reduces noise, provides a quiet O2 therapy environment, reduces irritability.

CVL series

Video Laryngoscope

HD Display

The 3" screen supports high resolution up to 640*480.

Free Rotation

The screen can be horizontal rotated 270 ° and vertical rotated 180 ° to adapt to different angles of use.

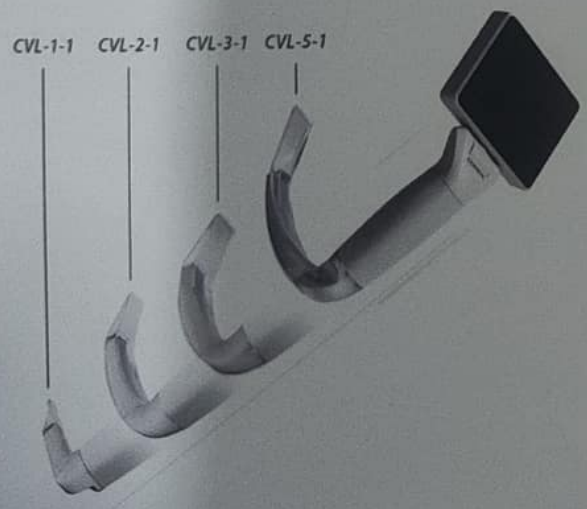

Ergonomic Design

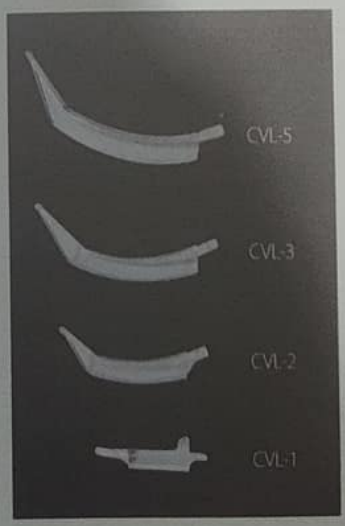

The blade adopts ergonomic design and specialized curvature to easily fit different airways.

Excellent View

CVL series is equipped with HD CMOS camera which provides high resolution up to 1-megapixel. Anti-fog treatment which provide clear view at every angle.

Various Blade Sizes

MX8900/M800/M800TCI/ME900

Infusion Workstation System
Syringe Pump / Infusion Pump

Flexible Combination, Various Applications

The modular, plug-and-play design brings the greatest flexibility of combination for various infusion scenarios, with expansion of slots from 2-24 infusion pumps.

Wards

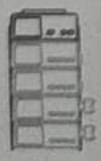

Transfer

NICU

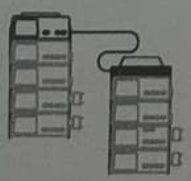

ICU/OR

Main controller

Easier operation by centralized management

Slave controller

Receives order from main controller, and provides one-cord charging

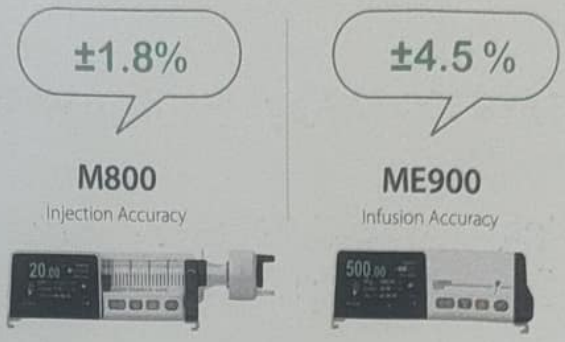

Portable Handle

Allows to be carried by hand

Precise Delivery

Comen M800/ME900 provides high precise and consistent performance for long-term infusion.

Dynamic Pressure System (DPS)

provides real-time pressure monitoring, reflects pressure changes during the infusion.

Normal **Near occlusion** **Occlusion**

Anti-bolus

No worry even when occlusion occurs. Comen M800/ME900 with anti-bolus function will release the high pressure, and reduce unexpected bolus to protect patients.

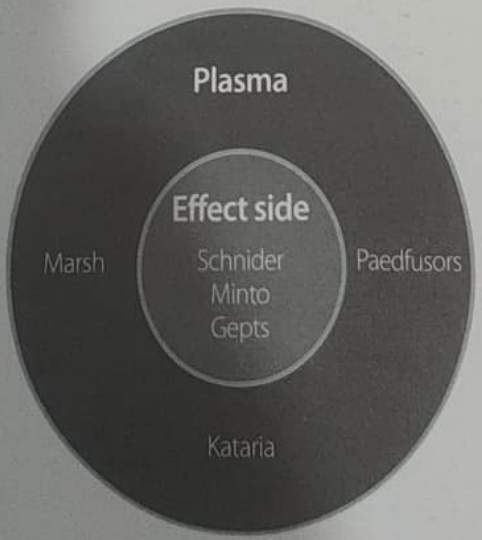

Pharmacokinetic Models:

Marsh & Schnider for Propofol administration on adults.

Kataria & Paedfusor for Propofol administration on pediatrics.

Minto, for Remifentanil and Gepts for Sufentanil.

Administration in delivery targets: TCI Effect or Plasma Control Modes.

M300/500
Syringe Pump

Dual-channel cascade

The dual-channel design of M500 provides a relay mode that not only allows for simultaneous injection of multiple drugs, but also cascade administration of the same drug to achieve continuous drug infusion. The maximum continuous single infusion is 120 ml of drug solution.

Extensive drug library

M500 provides a library of 2100 drugs and is customizable for r[illegible]ites, giving medical personnel essential drug options for infusion records to ensure [illegible]on safety.

Continuous titration

The infusion parameters setting can be changed without stopping it.

Functionally Extensive. Clinically Inclusive.

10 different working modes with wider setting ranges:

Rate/Time/Weight/Drip/Dose Time/Intermittent/Ramp/Micro/First Dose/Sequential

- Safer for pediatric/neonatal use
- Smooth & flexible workflow - *up to 9 phases of ramp up/down and up to 10 sequential setups available*
- Rates of up to 2000ml/h
- Infusion Time up to -100hrs

M260/ME660
Syringe/Infusion Pump

Capable of blood transfusion, medication and nutrition infusions.

EN1789

Meet the requirements for the equipping of road ambulances used for the transport and care of patients.

IP44

Have protection against solid objects bigger than 1 mm and prevent splashing water from all directions.

ME600 Infusion Pump

Shorten the Stay, Improve the Recovery Quality.

- Integrated 25°C -40°C heating panel
- Protect patients from perioperative hypothermia which lead to poor quality of recovery.
- Maintaining flow rate, prevent increased resistant of flow caused by low temperature.
